One of the most comfortable holds to have been held by two hands.

This is a ginormous sloper jug that can be used from 90 degrees to the most overhanging walls while, also, maintaining the ease of holding the sphere.

This is an exciting addition for the Toron Series.

Technical Information

MATERIAL

All holds are made with a PU material that is optimized for strength and flexibility.
All holds are produced by our manufacturer BlocSyndicate in Germany.

WEIGHT

Holds that are bigger than stated as a S or M have a hollow back to minimize the weight of the hold while maintaining its integrity.

FIXATION

To make the positioning of the climbing holds more flexible we offer two types of fixation. The first type is the classic fixation with a M10 bolt and one hole for screw, which is recommendable in order to avoid rotation of the hold. The second type of fixation is with screws only.
